The withdrawal and amendments listed in (a), (b), (d) and (e) above will commence with effect from the date of publication of this notice.

EBRAHIM PATEL
MINISTER OF TRADE, INDUSTRY AND COMPETITION

ANNEXURE A

Explanation of amendment of regulations and withdrawal of directions relating to the COVID-19 national state of disaster

Since the declaration of the State of Disaster to address the Covid-19 pandemic, the Minister of Trade, Industry and Competition (“the Minister”) has issued directions in terms of the Regulations issued by the Minister of Co-operative Governance and Traditional Affairs in terms of section 27(2) of the Disaster Management Act, 2002 (Act No. 57 of 2002), on measures to address, prevent and combat the spread of COVID-19. The Minister has further made regulations in terms of other legislation under the mandate of the department, including the Competition Act, 1998 (Act No. 89 of 1998) and the International Trade Administration Act, 2002 (Act No. 71 of 2002).

The five (5) notices contained herein seek to update certain regulations, withdraw two directions and provide information on others.

Call Centre Directions

On 9 April 2020, the Minister, together with the Minister of Health, issued directions in respect of Call Centres. These directions served the purpose of enabling the reopening of critical call-centre activities, taking health protocols into account; and provided certainty to both industry firms and law-enforcement officers.

On 4 June 2020, the Minister of Employment and Labour issued directions (“DEL directions”) addressing health protocols applicable across sectors, including the need for sector guidelines. The representatives of the industry have subsequently agreed to continue with active screening and reporting processes provided for in the current call-centre directions.

In light of the DEL directions and the agreement of the industry, the Minister, following consultation with the Minister of Health, now formally withdraws the directions regarding Call Centres providing Essential Services published in Government Notice No. R. 459 of 9 April 2020 of Government Gazette No. 43224.

Directions regarding the Sale of Cars and Emergency Automobile Repairs

On 12 May 2020, the Minister published Directions regarding the Sale of Cars and Emergency Automobile Repairs to provide for the gradual and phased re-opening of car dealerships during Alert Level 4.

The directions proposed three phases, over which gradual economic activity could begin based on the number of employees. The final phase, Phase 3, commenced with

effect from 8 June 2020, where up to 100% of employees are allowed back at dealerships, in addition to other protocols to ensure a safe operating environment for employees and customers.

On 4 June 2020, the Minister of Employment and Labour issued directions (DEL directions) addressing health protocols applicable across sectors, including the need for sector guidelines. The representatives of the industry have subsequently agreed to maintain the health and safety measures contained in directions.

In light of the completion of the phasing in of levels of employment, the DEL directions, and the agreement of the industry, the Minister now formally withdraws the Directions regarding the Sale of Cars and Emergency Automobile Repairs during Alert Level 4 of the Covid-19 National State of Disaster published in GNR. 524 of 12 May 2020 in GG No. 43308.

Directions regarding the Sale of Clothing, Footwear and Bedding during Alert Level 4

On 12 May 2020, the Minister published Directions regarding the Sale of Clothing, Footwear and Bedding, to be applicable during Alert Level 4. In view of the shift of the country to Level 3 with effect from 1 June 2020, the directions expired on 31 May 2020 and has not been in effect since 1 June 2020.

Covid-19 Export Control Regulations

On 27 March 2020, the Minister published regulations on licensing requirements for the export of certain medications, Personal Protective Equipment (PPE) and hand sanitisers. With a variety of lockdowns in place around the world, a need was identified to ensure sufficient supply in South Africa of critical goods such as PPEs, hand sanitizers, vaccines and medicine.

It is the intention of the Minister to progressively remove the licensing requirement on medication and related health products.

In the first phase, 40 categories of medication (set out at 8-digit level), will no longer require export permits under the COVID-19 Export Control regime. The medicines that will no longer be subject to export control include, inter alia, the following:

- Penicillin, antibiotics, hormones and vitamins for veterinary use;
- Tetracyclines;
- Chloramphenicol;
- Trimethoprim;
- Macrolides;
- Fluoroquinolones;
- Aminoglycosides;
- Other medicaments containing ephedrine or its salts;

- Other medicaments containing pseudoephedrine (INN) or its salts; and
- Other medicaments containing norephedrine or its salts.

In addition, export permits will not be required for individual prescriptions, or for clinical trials.

This reduces the categories of medication to 8 from the original 48 categories of medicines (at 8-digit level) included under HS30.04, which will remain subject to export control during COVID-19. These medicines include those that contain:

- narrow and broad spectrum penicillin for human use;
- cephalosporins for human use;
- antibiotics for human use;
- hormones for human use; and
- vitamins for human use.

Notwithstanding the above, in view of the priority assigned to ensuring security of supply to neighbouring countries, there will no longer be a requirement for exports to other SACU member states to obtain permits for medication during COVID-19. The Ministry is advised that exports of such medicines accounts for 76% of export permit requests for SACU during the period from 27 March to 9 June 2020 by volume. This change will therefore remove a significant administrative requirement on exporters of medication.

The World Customs Organisation recently changed the tariff classification of plastic face shields (that covers more than just the eyes) to HS3926.90 which at a national level translate to HS3926.90.43. Therefore, face shields classified under tariff code 3926.90.43 is now included in Schedule 4A. Medical ventilators classified under tariff code 9019.20 have also been included in Schedule 4A. In addition, food preparations not elsewhere specified or included, classified under HS2106.90.90 and herapin classified under HS3001.90 were previously classified under HS30.04 and hence remain under Schedule 4B.

In addition, Lyophilised Plasma, classified under HS3002.90.90 has been requested for inclusion by the National Department of Health.

Further consideration is being given to additional ways of reducing administrative requirements on the export of medication or of speeding up processing of applications.

COVID-19 Block Exemption for the Retail Property Sector, 2020

On 24 March 2020, the Minister published regulations to exempt certain conduct between designated retail tenants and the retail property sector to promote concerted conduct to prevent an escalation of the national disaster and to alleviate, contain and minimise the economic and social effects of the national disaster. Such designated

retailers included clothing, footwear and home textile retailers, personal care services and restaurants.

In terms of the Disaster Management Regulations, theatres and cinemas must remained closed to the public and all gatherings at these places or premises are prohibited during Alert Level 3.

The Department has received representation from stakeholders in the cinema exhibition industry on the safe re-opening of the sector, and is engaging in a process with stakeholders and the National Department of Health to determine the appropriate protocols for re-opening of the sector.

The sector has experienced hardships and requested that consideration be given to its inclusion in the above-named exemption. The COVID-19 Block Exemption for the Retail Property Sector, 2020 is therefore extended to the Cinema exhibition industry during this period.
